On the right side, select ASP.NET Web Application. In the Name field, type Beaver. This is the code name for our video rental store application. In the Location box, specify a location to create the files on the disk. Preferably, use a local drive and not a network drive. Otherwise, sometimes you may run into security or performance issues.

A Step-by-Step ASP.NET Tutorial for Beginners | Udemy Blog

ASP.NET Core is a significant redesign of ASP.NET. The most important ASP.NET Core principle I think you have to remember is the modularity. ASP.NET Core is a composition of granular NuGet packages and everything is excluded by default. That means you might

These refer to traditional rich client applications. 3. Console applications: These refer to traditional DOS kind of applications like batch scripts. 4.

.NET Tutorial for Beginners

Setting which part of the form has the cursor by default (called default focus) is easy in ASP.NET with the DefaultFocus property. Changing it is easy with the SetFocus method. You can give buttons keyboard equivalents by using the AccessKey property. Labels and input controls can be associated, which many web readers depend on.
