(Piano Method). The great Baroque master composer Johann Sebastian Bach (1685-1750) wrote music for every combination of instruments and voices. His simplest and purest work are four-part chorale compositions and settings, so perfectly constructed that they evoke meditative spirituality. "Figured bass" was a Baroque system of notating harmony. In addition to 371 chorales, this collection includes 69 melodies with figured bass. This classic Schirmer edition, edited by Albert Riemenschneider, has sold over 1,000,000 copies since its release in the early 20th century. Primarily for keyboard, the chorales can also be played by other instruments.

Following methods known to have been adopted by Bach himself, the exercises provided in chorale harmonization are graded in such a way as to encourage the student to develop both technique and imagination within a closely-defined framework. The instrumental counterpoint section is based on Bach's two-and three-part Inventions. By close analysis the author helps the reader to recognize the procedures Bach adopted in various musical situations. The exercises are taken largely from Bach's keyboard works.

Total 371, Nos. 199-371 in this volume. Volume 2 of Bach's historic settings of the chorales. C. P. E. Bach said of these chorales: "Those connoisseurs of the art of harmonizing and composing settings will likewise not withhold their praise when they observe with appropriate attentiveness the very unusual manner my father uses to set up harmony in these settings, the natural flow of the inner voices as well as the bass, factors which set these chorale settings apart from any others." The comb binding creates a lay-flat book that is perfect for study and performance.
