In *The Complete Beatles Songs*, Steve Turner shatters many well-worn myths and adds a new dimension to the Fab Four's rich legacy. This beautifully packaged book examines every Beatles-penned song and the inspiration behind them all; with fresh research and packed with new information, there are revelations aplenty. The book covers the Fab Four's entire output chapter by chapter and includes a complete set of printed lyrics to accompany each song, used with exclusive permission from the band's music publishers. Who was 'just seventeen' and made Paul's heart go 'boom'? Who was 'Lady Madonna'? Was there really an Eleanor Rigby? What inspired 'Happiness is a Warm Gun'? Why was Paul the 'walrus' and what inspired the lyrics to Ringo's 'Octopus's Garden'?

A complete and fascinating chronicle of Beatles music and history, *Beatlesongs* details the growth, evolution, and dissolution of the most influential group of our time. Drawing together information from sources that include interviews, insider accounts, magazines, and news wire services, this is a complete profile of every Beatles song ever written -- from recording details such as who played which instruments and sang what harmonies to how each song fared on the charts and how other musicians and critics felt about it. Chronologically arranged by U.K. release date, *Beatlesongs* nails down dates, places, participants, and other intriguing facts in a truly remarkable portrait of the Liverpoolian legends. Behind each song is a story -- like Paul's criticism of George's guitar playing during the Rubber Soul sessions, John's acid trip during the Sgt. Pepper's session, and the selection process for the Revolver album cover. And carefully examined along the way are the Beatles' evolving musical talents, their stormy private lives, and their successful -- and unsuccessful -- collaborations. *Beatlesongs* is truly an inside look at the Fab Four and a treasure for all their fans.

Composers, arrangers, conductors, session musicians, and executives worked in easy listening and scoring, complicating an academic focus that lionizes film music while ignoring or deriding easy listening. This book documents easy listening's connections with film music, an aspect overlooked in academic and popular literature. Fueled by the rise of the LP and home entertainment, easy listening became the largest midcentury commercial music market, generating more actual income for the record business than 7- inch singles. Easy listening roped in subgenres including classical, baroque, jazz, Latin, Polynesian, "exotica," rock, Broadway, and R&B, appropriated and reinterpreted just as they were for cinema. Easy listening provided opportunities in orchestral music for conservatory- trained composers. Major film composers such as Henry Mancini and Michel Legrand had a prodigious output of easy listening albums. Critics fault easy listening for structural racism, overlooking its evolution and practitioners. Easy listening helped destabilize a tripartite record business that categorized product as race records, old time records, or general popular music. Charlie Parker's with Strings records altered the direction of jazz, profoundly influencing other performers, encouraging bold crosspollinations, and making money. The influence of technology and historical contexts of music for work and leisure are explored. Original interviews and primary sources will fascinate scholars, historians, and students of cinema, television, film scoring, and midcentury popular music.

The Tao Te Ching is fundamental to the Taoist school of Chinese philosophy and strongly influenced other schools, such as Legalism and Neo-Confucianism. This ancient book is also central in Chinese religion, not only for Taoism but Chinese Buddhism, which when first introduced into China was largely interpreted through the use of Taoist words and concepts. Many Chinese artists, including poets, painters, calligraphers, and even gardeners have used the Tao Te Ching as a source of inspiration. Its influence has also spread widely outside East Asia, aided by hundreds of translations into Western languages.
